EXPERIENCE

QuintoAndar, São Paulo, SP — Front End Engineer

JULY 2017 - PRESENT

With a product driven mindset, and many talented people, I help to build QuintoAndar, the new generation Real Estate services in Brazil, with top-notch technologies such as PWA, ES6, React, Redux, Webpack, Nodejs, Styled-components, Jest, Enzyme, and so on. Metrics I have been helping to achieve so far are:

- Improve company's Net Promoter Score to a challenging rate
- Build features to help the company to scale
- Improve company's communications systems
- Improve company's SEO and marketing presence

PRTE, Barbacena, MG — Full Stack Developer

APRIL 2017 - JULY 2017

We used to build full scalable and stable applications for our clients. Our goal was to use technology to make people's life easier somehow, what we used to achieve by focusing on listening to customers' needs and delivering more than software solutions, but satisfaction and value. The technologies I used were ES6 Javascript, Angularjs, and Reactjs for the Front End, and Ruby on Rails, and Nodejs for the Back End.

University of California, Irvine, CA — Junior Specialist

JUNE 2016 - SEPTEMBER 2016

During this internship, I was part of the team developing a project called "Exergame", which aims to stimulate people exercising while they're playing games as Minecraft or Pokemon GO. I helped to build the web app Front End with Angularjs and I also got to give some small Java contributions.
