WEB DEVELOPMENT
HTML5 | CSS3 | SASS
Javascript | Angular.JS |
Node.JS | React | MEAN
Stack | Ruby on Rails

INFRASTRUCTURE
Linux servers | Network Management | System Analyses

LEARNING / INTERESTED IN
TypeScript

EXPERIENCE

UNIVERSITY OF CALIFORNIA | Junior Specialist
June 2016 – September 2016 | Irvine, CA
During this internship, I was part of the team developing a project called "Exergame", which aims to stimulate people exercising while they're playing games as Minecraft or Pokemon GO, for example. I helped to build the web app front-end with Angular.js and also some small Java backend contribution. In the University, I also started learning about SDN to build a GNS3 lab for Professor Magda El Zarki.

INSTITUTO FEDERAL DO SUDESTE DE MINAS GERAIS | IT Analyst Intern
June 2014 – June 2015 | Barbacena, Brazil
As an IT Analyst intern, I was part of the University's IT team, where I had the opportunity to help solving daily staff issues. From creating scripts to managing and building new networks, I had access to sensitive information and learned a lot from IT management and team work.

TECSHOP | Technical Support Leader
January 2012 – June 2014 | Barbacena, Brazil
I was part of the IT Support team, dealing directly with the customers. I was able to fix issues with the hardware, software and network from companies and general people who we were attending at the moment. I could also develop small solutions softwares and websites. I learned a lot from dealing with the customers, and also from being the team leader. During that time, the support office achieved a higher production level and was financially rewarded because of that.

COURSES

CISCO NETWORKS | CCNA 1 & CCNA 2
Bradesco Foundation | Sao Joao Del Rei, Brazil
Cisco Certified Network Academy: CCNA 1 Exploration – Network Fundamentals and CCNA 2 – Routing and Switching Essentials.

ACTIVITIES

24-HOUR EVENT HACKATHON | CalState EastBay
November 2015 | Hayward, CA
Using the Wi-Fi Pineapple to perform the Man in the Middle hacking attack, we intercepted user's informations, by forcing them to use an unprotected version of the website, using SQL Injection, Phishing, and DNS Spoofing.

THE GOOGLE GAMES | Google
April 2016 | Mountain View, California

HONORS
